

# THE EDGE OF WATER TRENDS AND BEST PRACTICES IN BUILDING WATER USE

*Pure Freude an Wasser*

## COURSE DESCRIPTION

Trends and best practices in building water use.

During this hour-long, interactive course, participants will learn:

- Understand the importance of water conservation efforts in buildings
- Recognize the types of requirements related to water-efficiency required by relevant green building rating systems and certification programs
- Identify specific strategies for improving water efficiency in buildings
- Take into account other sustainability considerations, such as design, quality, user experience, and manufacturing practices

## GENERAL COURSE INFORMATION

**Title:** The Edge Of Water

**LU Hours:** 1

**Course time:** 1 hr.

**Course number:** G102

**Provider Number and Name:** K421 GROHE America
