

Provider: **TOTO**

Length: **1 Hour**

AIA Course Number: **ITO220**

Credits: **1 AIA HSW CE Hour.**

**1 GBCI General Hour**

**1 IDCEC HSW CEU**

Course Title: **People, Our Planet, and Water**

**1 ASPE CEH**

---

### **Description**

In this course, the design professional will gain insight into water efficiency and the role of sustainable plumbing. We will discuss testing and standards, as well as emerging environmental technologies. The increasing importance of product transparency will be addressed, especially regarding contributions to LEED certification.

### **Learning Objectives**

By completing this course, the design professional will be able to:

1. Define Water Efficiency
2. Explain why additional testing may be needed beyond that required to meet the WaterSense specification for toilets
3. Distinguish between reducing the volume of water used in a building and reducing flow rates
4. Select technologies for use in designing bathrooms which continue toward LEED points and meet long-term sustainability goals

### **Method of Delivery**

The course is offered to design professionals in a lunch and learn classroom setting. The course is presented in PowerPoint.

### **Cost to Participants**

The course is sponsored by the manufacturer and is therefore offered to designers at no cost.
