ABOUT ESS

TRENDSETTING BATHROOM SOLUTIONS

ESS stands for Easy Sanitary Solutions, and at the same time is the best and most appropriate statement to describe our products. Simple, practical and advantageous for installation specialists and end users, and of the very highest quality.

As a Dutch family business, dealing with water is second nature to us. That is why we provide exellent drainage solutions to suit every need and situation. We are the inventors, developers and official suppliers of Easy Drain linear shower drains. As the initiators of barrier-free bathroom layouts, we have proven that our bathroom solutions are simple, practical and elegant.

A bathroom should be as aesthetically pleasing as it is functional, which is why we place great emphasis on technical development and design. This translates into beautiful and unique container bathroom accessories.

a company of
Hansgrohe Group

OUR HISTORY

1928

WERE IT STARTED

It all began in 1928, in the small village of Losser (the Netherlands) where our family-owned company, Keizers, began designing, manufacturing and selling sanitary solutions. It was here that we laid the foundations for ESS's achievements, and our success continues today.

WHERE WE ARE NOW

We have grown from our humble beginnings, and now operate in two state-of-the-art factories in the Netherlands and Germany, selling and distributing to over 40 countries and delivering high-quality and innovative design that has transformed bathrooms worldwide.

HEAD OFFICE

In 2013, we opened our head office in Oldenzaal, Netherlands. This is the global center for product development, sales, marketing and finance. Our head office is located less than 10 km from where the Easy Drain was first invented.

2013

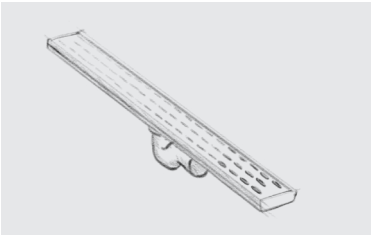
KEIZERS SHOWROOM

The family business, Keizers, opened its showroom in Losser, where it started to sell bathrooms, kitchens and tiles. This place saw the conception and development of many of our innovative products and solutions.

1972

INVENTING THE LINEAR SHOWER DRAIN

When the Keizers brothers invented the Easy Drain linear shower drain, it established floor-level showering and transformed bathrooms worldwide. This invention led to Easy Sanitary Solutions (ESS) being established as a company.



2002

FACTORY & TRAINING CENTER

In 2009, we opened our ultra-modern factory and training center in Bad Bentheim, Germany. It's here that all of our innovative products, including the Easy Drain, are manufactured and prepared to send to clients all over the world.

2009

EXPERIENCE CENTER

In 2014, we relocated the Keizers showroom from Losser. Now, it's right next to the ESS head office in Oldenzaal. This state-of-the-art experience center showcases bathrooms, tiles and other ESS products.

2014

FACTORY EXPANSION

We have a strong global presence and our cutting-edge, innovative products are in high demand worldwide. 2017 saw the expansion of ESS's factory and warehouse in Germany to allow us to increase production.

2017

FIT FOR THE FUTURE

Innovation is at the heart of everything we do at ESS. 2020 saw a significant digital transformation, enhancing our traditional manufacturing process with advanced technology and ensuring our business is fit for the future.

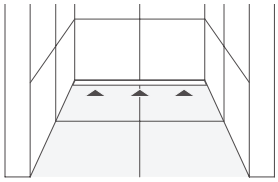
INSTALLATION

WALL INSTALLATION

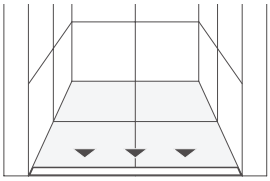
Installation against the wall and between the two side walls. This type of installation requires a one-sided slope and offers high drainage capacity.



* Requires an exact length of the shower drain

ENTRANCE INSTALLATION

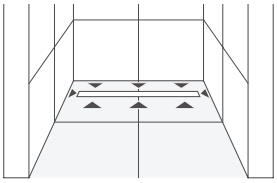
Installation at the entrance of the shower between the two walls. This type of installation requires a one-sided slope.



* Requires an exact length of the shower drain

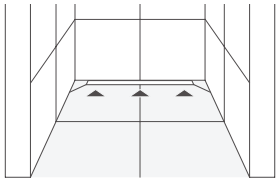
FREE IN THE FLOOR INSTALLATION

Installation with floor tiles on all four sides of the shower drain. This installation requires a four-sided slope.



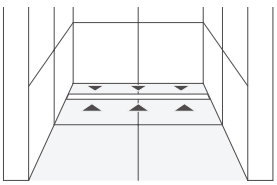
ONE-SIDED INSTALLATION

Installation against the wall with tiles on the other three sides. This type of installation requires a three-sided slope and offers high drainage capacity.



WALL TO WALL INSTALLATION

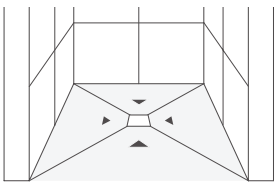
Installation between the walls, with floor tiles on either side of the shower drain. This type of installation requires a two-sided slope.



* Requires an exact length of the shower drain

FREE IN THE FLOOR INSTALLATION

Installation with floor tiles on all four sides of the shower drain. This installation requires a four-sided slope.



WATER PROTECTION SYSTEM (WPS)

Easy Drain's innovative Water Protection System (WPS) provides an easy-to-install and safe-to-assemble seal system for shower drains. This WPS-system consists of a flexible waterproofing membrane which is connected to the linear drain's stainless steel flanges or the floor drain's special cuff. This way, leaking as a result of faulty installation due to unfavorable conditions is eliminated.

Preferred by professionals worldwide

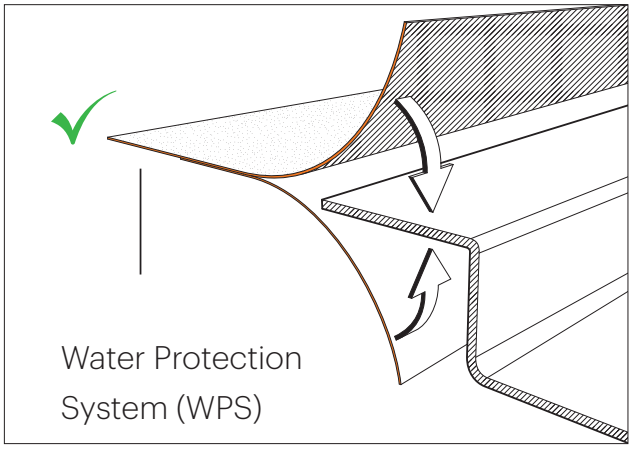
Easy Drain's WPS-system is developed with over more than 16 years of experience in the sanitary industry and is preferred by professional installers and tilers worldwide. This shows once again, that the easy and safe solutions of ESS are a milestone in shower drainage design and development.

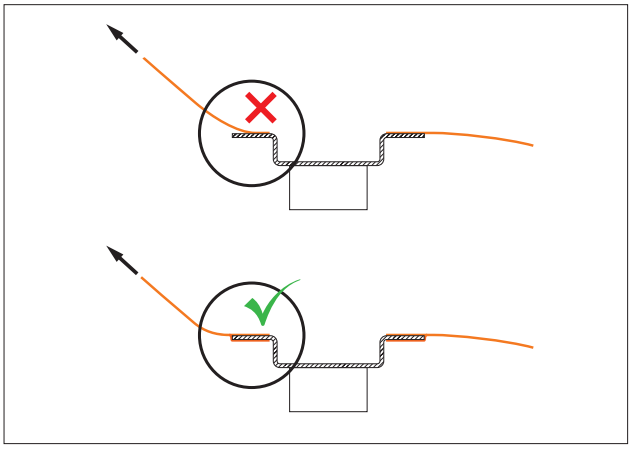
Perfect waterproof connection

WPS forms the perfect waterproof connection between a drain and its surrounding floor when using a rapid-drying flexible sealing compound. Unique to this system is that it's pre-assembled in a controlled manufacturing environment, therefore preventing assembling mistakes or adhesive problems caused by working in an unclean construction site.

Advantages

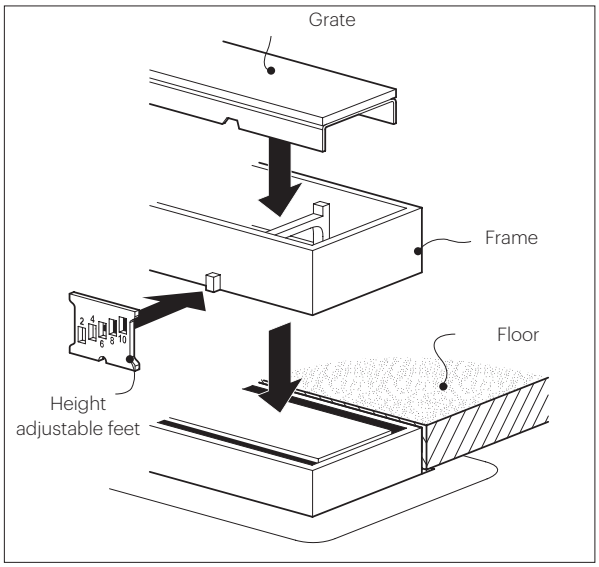
- Guaranteed a 100% watertight installation
- 10-year warranty
- Factory pre-assembled waterproofing membrane
- Tear resistant
- Can be installed on Hotmop (after the Hotmop is cooling down)





TILE ADJUSTABLE FRAME (TAF)

› Perfect finish with closed tile edges
› Saves time and eliminates guesswork
› Frame length adjustable using extension set
› Available sizes up to 78 3/4" (2000 mm)

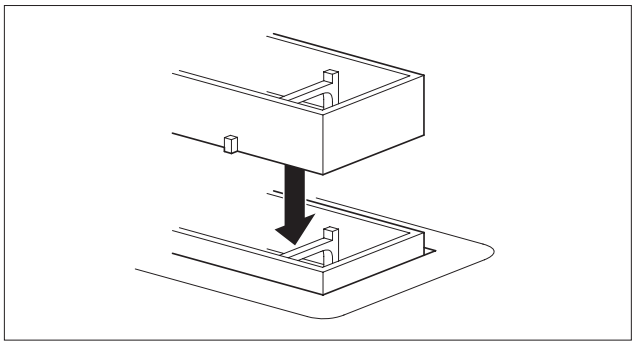


TAF

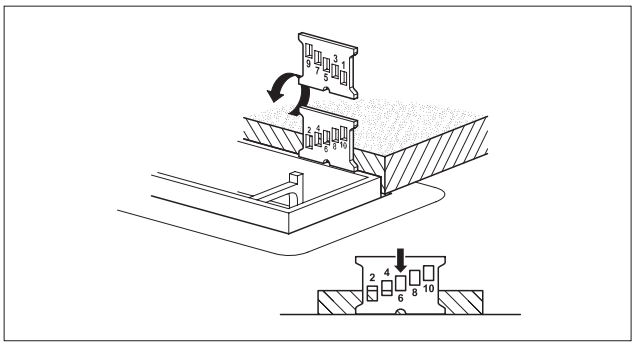
› Standard thickness flooring
› 1/4" - 3/4" (7 - 18 mm)
› Tile

INSTALLATION

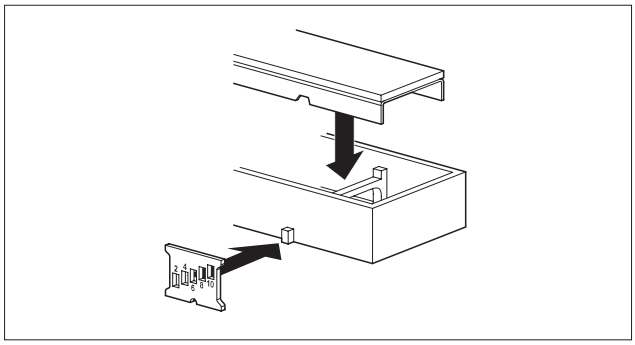
1. Position



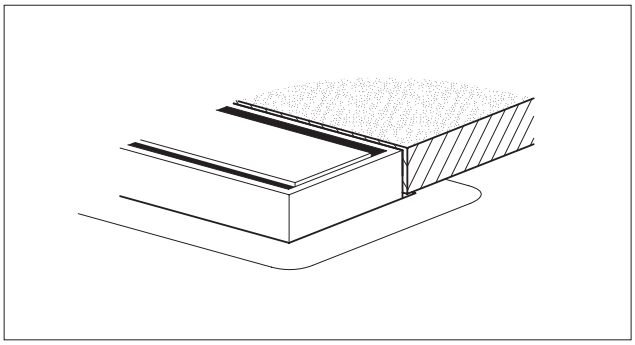
2. Measure



3. Adjust



4. Level

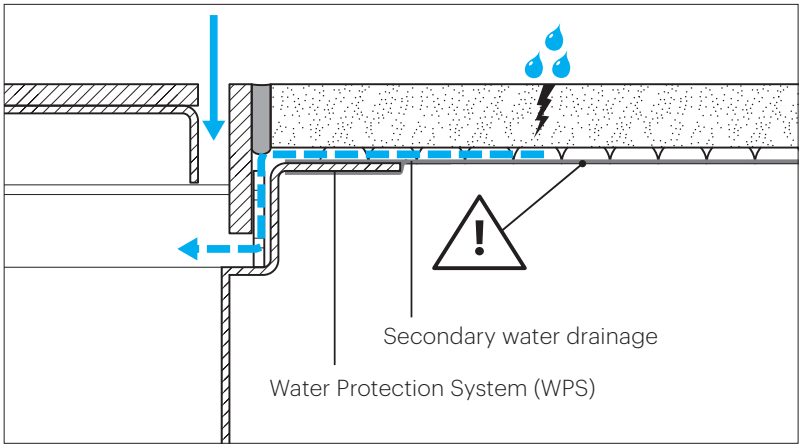


SECONDARY WATER DRAINAGE

With our patented TAF-system (Tile Adjustable Frame) we offer a unique option to apply secondary drainage in a barrier-free installation. This way, any water leaking under the tiles due to porous sealant or cracks can flow back into the shower drain. The stainless steel TAF frame can be easily adjusted in height, after installing the drain's rough, to match the level of the surrounding tiled floor. All shower drains with TAF-system are also equipped with our pre-assembled sealing membrane (WPS).

Advantages

- Any water leaking under the tiles can flow back into the shower drain
- Tile Adjustable Frame for easy leveling to any tile thickness
- Water Protection System for a 100% watertight installation
- 10-year warranty with our Easy-seal system



SELF-ADHESIVE WATERPROOFING MEMBRANE (SAM)

SAM is a revolutionary seal system based on elastic foam technology. The self-adhesive waterproofing membrane can be applied directly to wall and floor surfaces without using additional liquid sealing material. The top side is fleece-coated with an anti-bacterial film and offers an ideal base surface for every type of tile adhesive.

100% Watertight

Most moisture related damages result from improper installation of liquid sealed sealing membranes, wall-to-floor transfers and drainage systems. The patented SAM seal system avoids moisture damage by using fleece free impact bonding. The non-woven zones interrupt the capillary movement of moisture and ensure a 100% watertightness.

The following primed base surfaces can be sealed with SAM:

- Concrete
- Cement screeds
- Dry screed
- Existing ceramics (tiles)
- Plasterboard
- Timber

Advantages

- Time-saving installation (no drying time)
- Surface immediately ready for tiling
- Suitable for all types of building chemicals
- No more liquid sealing necessary
- 100% watertight warranty - 10-year warranty
- Antibacterial fleece coating to prevent mold formation
- High material elasticity prevents cracking
- Acoustic decoupling between finished surface and building construction
- Instantly high adhesive force (20 ton / ft2)
- Can be installed on Hotmop (after the Hotmop is cooling down)

Uniform Plumbing Code includes Sam (Easy Seal). ANSI A118.10-2014, which is a component standard of the ANSI A108, A118, A136 Specifications for the Installation of Ceramic Tile (Material & Installation Standards). **See Easy Seal for more information.**

CONTAINER

With our Container Series storage solutions, you can conveniently hide away all your bathroom and toilet items. The series has been specifically developed for use in wet areas and offers a 100% watertight installation. Because of it's perfect and sleek design, Container Series products will fit harmoniously into any bathroom.

Easy installation

Our Container storage solutions are available in various dimensions and color finishes. Installation and waterproofing are made easy thanks to included built-in element and self-adhesive sealing membrane. All the products are suitable for recess and semi recess mounting in drywall and offer uncomplicated tiling. Find out what our Container Series can do for your bathroom.

Advantages

> High-quality stainless steel
> Easy to install with uncomplicated sealing and tiling
> Specifically developed for application in wet area
> Various design finishes

Recess and semi recess installation

SAM (SELF-ADHESIVE WATERPROOFING MEMBRANE)

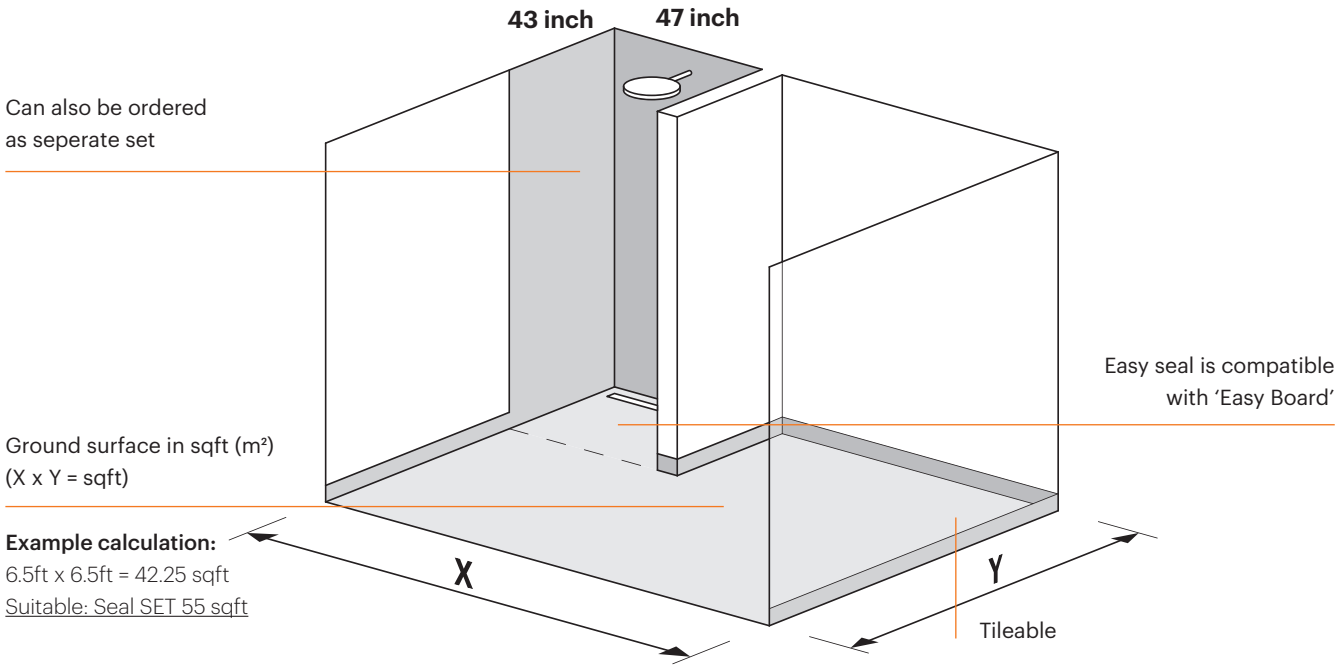
SAM is a self-adhesive membrane system, which creates easy and secure waterproofing. With this seal set, we guarantee 100% watertightness of the entire shower or bathroom area, and a certificate is included with all standard packages. SAM is certified in accordance with c-UPC, ETAG 022, ab (P) and ANSI 18110.

The SAM system is based on elastic foam technology, and the self-adhesive membrane can be applied directly to wall and floor surfaces without using any additional liquid material. The top side is coated with an anti-bacterial film, and offers an ideal base surface for every type of tile adhesive.

The patented SAM system avoids moisture damage by using fleece-free impact bonding. The non-woven zones interrupt the capillary movement of moisture and ensure 100% watertightness.

You should always prepare the walls and floors with a primer before installing the self-adhesive membrane.
The walls and floors must be solid, dry and dust free.

SAM offers two options to waterproof: only the wet area, or the complete bathroom. The sets are suitable for most situations, and can be combined.



SAM SETS for bathroom:
55 sqft max
80 sqft max
105 sqft max

SAM SETS for shower area are max. 43" x 47".
SAM SETS for bathroom include sufficient material to waterproof the entire bathroom and the shower area with U-Shape.

EASY SEAL SETS | FOR BATHROOM

SEAL SET SAM - FW 55 SQFT (5 M²)

Compatible with Easy Boards, see 'Easy Board'. SET contains material sufficient for 188 sqft total surface (floor, walls etc.) Wet area with U-shape (niche) is included.

Content:

- 6 x Inside corner self-adhesive
- 1 x Outside corner self-adhesive
- 3 x SEAL Wall sleeve self-adhesive 1/2"
- 1 x SEAL Corner tape self-adhesive 65ft x 4" (20 m1 x 10 cm)
- 1 x SEAL Finishing tape self-adhesive 32ft x 4" (10 m1 x 10 cm)
- 1 x SEAL Finishing tape self-adhesive 32ft x 11 13/16" (10 m1 x 30 cm)
- 1 x SEAL Seal membrane self-adhesive, incl. processing aid 98ft x 19 3/4" (30 m1 x 50 cm)
- 2 x Test sample
- 1 x Sleeve DN 100
- 1 x Certificate
